## PROFESSIONAL SUMMARY

Regulatory affairs, quality, and program management professional with experience at Medtronic, Johnson & Johnson (DePuy Synthes), and BD. Background includes review of clinical study results, patient-level clinical information, adverse event documentation, medical device technical records, validation, change control, and cross-functional program execution in regulated environments. Doctor of Health Science candidate (clinical track) with coursework and training in clinical research, Good Clinical Practice, and human subjects protection. Interested in clinical research operations, CRO, regulatory affairs, and clinical project/program management opportunities.

## CORE EXPERTISE

Clinical Research & GCP Principles • Clinical Study Results Review • Clinical Safety Documentation • Adverse Event Documentation • Biomedical Laboratory Techniques • Clinical Specimen Integrity • Regulatory Affairs • Medical Device Quality Systems • FDA / ISO Compliance • Clinical Documentation • Data Integrity

## CLINICAL LABORATORY & BIOMEDICAL RESEARCH SKILLS

Polymerase Chain Reaction (PCR) • Flow Cytometry • Stem Cell Transcription–Related Laboratory Experience • Microbiology Cultures • Light Microscopy • Phlebotomy & Specimen Collection • Specimen Processing & Traceability • Clinical Chemistry • Laboratory Quality Control • CAP / CLIA • ISO 15189

## PROFESSIONAL EXPERIENCE

**BD (Becton Dickinson)** | *2025–2026*

Senior Project Lead — Quality & Digital Manufacturing

- Led the assessment, development, and Phase 1 implementation of the $2.5M Tulip Electronic Device History Record (eDHR) digital manufacturing initiative. Directed requirements gathering, solution design and configuration, SAP ERP integration, Computer System Validation (CSV), IQ/OQ/PQ, SIT/UAT, change control, and a limited production pilot. Coordinated Manufacturing, Quality, Regulatory Affairs, IT, Validation, Finance, and external technology vendors.
- Supported requirements, systems integration testing, validation documentation, change control, and controlled pilot implementation for an electronic device history record (eDHR) solution.
- Coordinated program reporting, issue resolution, schedules, and compliance documentation across multiple stakeholders.

**Johnson & Johnson — DePuy Synthes** | *2021–2023*

Global Project Manager — Regulatory Affairs & Quality

- Led global regulatory data migration from ADAPTIV PLM (ENOVIA) and Oracle Agile PLM to PTC Windchill PLM, coordinating organizational change management, data integrity, user training, and pilot implementations across multiple global divisions.
- Supported validation and verification, technical documentation, and investigation of data discrepancies in FDA- and ISO-regulated operations.
- Managed cross-functional deliverables, stakeholder communications, and program reporting across global teams.

**Medtronic** | *2013–2020*

Global Program Lead — Regulatory & Quality Compliance

- Reviewed clinical study results, patient-level clinical information, and adverse event reports involving investigational and marketed medical devices.
- Reviewed serious adverse event investigation documentation prepared by other departments to support clinical safety and regulatory compliance activities.
- Reviewed design documentation, SOPs, technical records, and quality documentation against FDA, ISO, and internal requirements; coordinated global compliance initiatives.

**Quest Diagnostics** | *2010–2013*

Laboratory / Patient Services & Quality Professional

- Performed phlebotomy, specimen identification, collection, processing, and clinical laboratory workflows while maintaining specimen integrity and accurate records.
- Supported clinical chemistry, blood culture, and microbiology workflows under CAP, CLIA, safety, and infection-control requirements.

**Northern Westchester Hospital — Mount Kisco, NY** | *2005–2010*

Patient Care Associate

- Provided direct patient care and multidisciplinary clinical support, including phlebotomy, EKG procedures, and specimen handling.
- Received a hospital award for Excellence in Patient Care.

Pfizer Pharmaceuticals | 1999–2004

Pharmaceutical Sales Representative

- Engaged healthcare professionals to communicate pharmaceutical product information and support professional relationships within the pharmaceutical industry.

## EDUCATION

Doctor of Health Science (D.H.Sc.), Clinical Track — Candidate, University of Bridgeport

Master of Health Science, Medical Laboratory Science — Quinnipiac University

Bachelor of Arts in Science — College of Mount Saint Vincent | Bachelor of Science, Biology — Universidad Industrial de Santander

## TRAINING & PROFESSIONAL DEVELOPMENT

Good Clinical Practice (GCP) — NIDA Clinical Trials Network • ACRP Clinical Research Coordinator Training • FDA Clinical Investigator Training (CDER) • HHS OHRP Human Research Protections Training (Oct. 2026) • Duke University Health System: Pragmatic Clinical Trial Study Design (continuing education) • NIH: Principles of Clinical Pharmacology (coursework; 2026–2027 program) • Six Sigma Green Belt

## REGULATORY KNOWLEDGE & TOOLS

FDA QMSR / 21 CFR Part 820 • EU MDR 2017/745 • ISO 13485 • ISO 14971 • Design Controls • CAPA • Controlled Documentation • Clinical Research / GCP Principles • Microsoft Excel • Microsoft Project • Smartsheet • SharePoint • Power BI • PTC Windchill • Oracle Agile PLM • SQL and Python (working knowledge)

## ADDITIONAL RECOGNITION

National Science Foundation Fellowship • Hibbitt Endowed Education Fund Recipient

## INDEPENDENT TECHNOLOGY PROJECT

**AUDIVION | Founder & Technology Project Lead | 2025–Present**

Independent Digital Health Technology & AI-Enabled Quality Systems project exploring AI-assisted regulatory document analysis, quality risk assessment, digital records, and workflow automation. Python, Flask REST APIs, SQLite, and software quality concepts; prototype/development work, not represented as a commercial or formally validated product.

## ADDITIONAL QUALITY & DIGITAL TECHNOLOGY CAPABILITIES

QMS & REGULATORY TECHNOLOGY: ISO 13485, ISO 14971, FDA 21 CFR Part 820/QMSR, EU MDR, CAPA/RCA, FMEA, SOPs, document control, CSV, IQ/OQ/PQ, SIT/UAT, traceability, CAP/CLIA, ISO 15189.

DIGITAL TECHNOLOGY & AI: Python fundamentals, SQL, Flask REST APIs, SQLite, cloud fundamentals (AWS/Azure/GCP), AI-assisted document analysis, eQMS concepts, audit trails, RBAC, electronic signatures, SHA-256 integrity concepts, FDA 21 CFR Part 11.
