PROFESSIONAL SUMMARY

Medical device and MedTech program leader with extensive experience driving global regulatory transformation, quality systems compliance, digital manufacturing, and enterprise PLM modernization at Medtronic, Johnson & Johnson (DePuy Synthes), and BD. Led EU MDR compliance programs, global regulatory data migration from ADAPTIV PLM (ENOVIA) and Oracle Agile PLM to PTC Windchill, and the assessment, development, and Phase 1 implementation of a $2.5M Tulip eDHR initiative. Expertise spans ISO 13485, ISO 14971, FDA 21 CFR Part 820/QMSR, design controls, validation, data integrity, cross-functional leadership, and organizational change management. Doctor of Health Science candidate (Clinical Track).

CORE QUALIFICATIONS

Global Medical Device Program Management • EU MDR 2017/745 Compliance • FDA 21 CFR Part 820 / QMSR • ISO 13485 & ISO 14971 • QMS Governance • Design Controls & Technical Documentation • Risk Management / FMEA / CAPA • Digital Manufacturing & Tulip eDHR • PLM Migration (ENOVIA / Oracle Agile → Windchill) • Computer System Validation (CSV) • IQ/OQ/PQ • SIT/UAT • SAP Integration • Change Management • Data Integrity • Global Pilot Deployment • Stakeholder & Vendor Management

REGULATORY & QUALITY KNOWLEDGE

EU MDR 2017/745 • FDA 21 CFR Part 820 / QMSR • ISO 13485 • ISO 14971 • FDA 21 CFR Part 11 • Design History File (DHF) • Design Controls • Technical Documentation • CAPA & Root Cause Analysis • FMEA • Change Control • SOPs & Document Control • Risk-Based Quality Management • Audit Readiness • Process Validation • Electronic Device History Records (eDHR)

PROFESSIONAL EXPERIENCE

BD (Becton Dickinson) **2025–2026**

Senior Project Lead — Quality & Digital Manufacturing

- Led the assessment, development, and Phase 1 implementation of the $2.5M Tulip Electronic Device History Record (eDHR) digital manufacturing initiative. Directed requirements gathering, solution design and configuration, SAP ERP integration, Computer System Validation (CSV), IQ/OQ/PQ, SIT/UAT, change control, and a limited production pilot. Coordinated Manufacturing, Quality, Regulatory Affairs, IT, Validation, Finance, and external technology vendors.
- Coordinated Quality, Manufacturing, Engineering, and technical activities while maintaining organized compliance documentation and multiple concurrent deadlines.
- Applied structured problem-solving and data analysis to investigate issues, document findings, and support implementation decisions.

Johnson & Johnson — DePuy Synthes **2021–2023**

Global Project Manager — Regulatory Affairs & Quality

- Led global regulatory and product lifecycle data migration from ADAPTIV PLM (ENOVIA) and Oracle Agile PLM to PTC Windchill PLM, emphasizing data integrity, traceability, and standardized quality and regulatory processes.
- Coordinated organizational change management, stakeholder engagement, user training, and pilot implementations across multiple global divisions to support adoption of the target PLM platform.
- Directed cross-functional program planning, documentation governance, issue resolution, and executive reporting across geographically distributed teams.

Medtronic **2013–2020**

Global Program Lead — Regulatory & Quality Compliance

- Reviewed clinical study results, patient-level clinical information, and adverse event reports involving investigational and commercially marketed medical devices.
- Reviewed reports and serious adverse event investigation documentation prepared by other departments, supporting cross-functional clinical safety and regulatory compliance reviews.
- Reviewed medical device design documentation, SOPs, technical records, and quality documentation against applicable FDA, ISO, and internal compliance requirements; coordinated related program and quality activities.

Quest Diagnostics **2010–2013**

Laboratory / Patient Services & Quality Professional

- Performed phlebotomy and venipuncture for patient blood specimen collection according to established laboratory procedures.
- Collected, identified, labeled, processed, separated, and prepared blood specimens while maintaining patient identification and specimen-integrity requirements.
- Supported blood chemistry testing and clinical chemistry laboratory workflows.
- Collected and processed blood cultures and supported microbiological specimen collection, preparation, and testing workflows.
- Followed multi-step laboratory procedures and written work instructions; maintained accurate patient, specimen, laboratory, and quality records.

- Followed CAP, CLIA, laboratory safety, infection-control, PPE, specimen-handling, and quality requirements while managing multiple specimens within established turnaround times.

Northern Westchester Hospital — Mount Kisco, New York **2005-2010**

Patient Care Associate

- Provided direct patient care and clinical support across multiple hospital units in collaboration with nurses, physicians, and multidisciplinary healthcare teams.
- Performed phlebotomy and blood specimen collection and collected specimens for blood cultures following patient-identification, infection-control, and specimen-handling procedures.
- Performed EKG procedures and supported the collection of diagnostic clinical information.
- Prepared, labeled, and handled patient specimens and maintained accurate and timely clinical documentation.
- Managed multiple patient-care priorities in a fast-paced hospital environment, demonstrating strong organization and time-management skills.
- Maintained CPR training and supported emergency-response activities as required.
- Received a hospital award for Excellence in Patient Care.

Pfizer Pharmaceuticals | 1999–2004

Pharmaceutical Sales Representative

- Communicated pharmaceutical product information to healthcare professionals and developed professional relationships within the pharmaceutical industry.

EDUCATION

- Doctor of Health Science (D.H.Sc.) — Candidate, Clinical Track
- Master of Health Science — Medical Laboratory Science, Quinnipiac University
- Bachelor of Arts in Science — College of Mount Saint Vincent
- Bachelor of Science — Biology, Universidad Industrial de Santander

RELEVANT SCIENTIFIC & CLINICAL BACKGROUND

General Chemistry • Clinical Chemistry • Biology • Microbiology • Medical Laboratory Science • Blood Chemistry • Hematology Concepts • Clinical Specimen Collection & Processing • Blood Cultures • Laboratory Quality Systems • Infection Control • Laboratory Safety • Clinical Research Principles • Data Interpretation • Quality Assurance • Regulatory Compliance

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

Six Sigma Green Belt • Good Clinical Practice (GCP), NIDA Clinical Trials Network • ACRP Clinical Research Coordinator Training • FDA Clinical Investigator Training (CDER) • CPR Training

- NIH — Principles of Clinical Pharmacology | Certificate of Completion (2026–2027 program)
- Duke University Health System — Pragmatic Clinical Trial Study Design | Completed continuing education activity (0.75 credit hours)
- HHS OHRP — Human Research Protections Training (Oct. 2026): HHS Regulations; Human Subjects Research; Institutional Review Boards (IRBs); Human Research Protection (Lessons 1, 2, 3 and 5).
- Honors: National Science Foundation Fellowship • Hibbitt Endowed Education Fund Recipient

TECHNICAL & QUALITY SYSTEMS

Microsoft Excel • Microsoft Project • Smartsheet • SharePoint • Power BI • PTC Windchill • Oracle Agile PLM • Quality Documentation Systems • Data Management • SQL (Working Knowledge) • Python (Working Knowledge)

INDEPENDENT TECHNOLOGY PROJECT

AUDIVION | Founder & Technology Project Lead | 2025–Present
Independent Digital Health Technology & AI-Enabled Quality Systems project exploring AI-assisted regulatory document analysis, quality risk assessment, digital records, and workflow automation. Python, Flask REST APIs, SQLite, and software quality concepts; prototype/development work, not represented as a commercial or formally validated product.

ADDITIONAL QUALITY & DIGITAL TECHNOLOGY CAPABILITIES

QMS & REGULATORY TECHNOLOGY: ISO 13485, ISO 14971, FDA 21 CFR Part 820/QMSR, EU MDR, CAPA/RCA, FMEA, SOPs, document control, CSV, IQ/OQ/PQ, SIT/UAT, traceability, CAP/CLIA, ISO 15189.

DIGITAL TECHNOLOGY & AI: Python fundamentals, SQL, Flask REST APIs, SQLite, cloud fundamentals (AWS/Azure/GCP), AI-assisted document analysis, eQMS concepts, audit trails, RBAC, electronic signatures, SHA-256 integrity concepts, FDA 21 CFR Part 11.
